

Demolition, Clearing and Grubbing

The work under this section shall consist of partial clearing, grubbing, demolition and removal of all vegetation, debris, existing pavement, and structures from within the project area necessary to perform all items of work as shown on plans and set forth in the Specifications.

CLEARING

The area within the construction limits shall be cleared of all surface objects and all trees, stumps, roots, and other objectionable obstructions resting or protruding through the surface of the original ground not designated to be retained.

GRUBBING

Areas within the construction limits shall be grubbed of all objectionable matter on or projecting through the ground surface. All fill areas shall be grubbed to a depth at least one foot below the natural ground.

DISPOSAL

Burning of perishable material **will not** be acceptable. All material shall be removed from University property unless approved by the owner.

Only such property may be salvaged by the Contractor as is directed by the Project Manager and in the event of any doubt respecting the ownership of any particular property, the Contractor shall request from the Project Manager a written statement respecting its ownership.

All salvage becomes the property of the Contractor, but storage of such materials and equipment on the project area will not be permitted except for the duration of the Contract and such storage shall at no time interfere with activities of the Owner or of other Contractors.

Removal and proper disposal of all abandoned sidewalks, pipes, culverts, pavement, structures and appurtenances that require removing to complete construction as shown on the plans and set forth in the Specifications shall be the responsibility of the contractor.

Material and debris removed from the project shall be disposed of in a manner acceptable to the Project Manager. Indiscriminate dumping of these materials on abutting property with or without the owners consent will not be considered satisfactory disposal. The Contractor must comply with all local, State and Federal laws and ordinances pertaining to the type of material being disposed of.

Contractor will be responsible for coordinating with the respected utility companies for “capping” of all abandoned utilities.
